

# HeartSafe Imaging

*You deserve to be safe...HeartSafe*

**With new technology, HeartSafe is a safer way to have a nuclear medicine stress test. Trust us with your Heart.**

## We use:

### **Less radiation exposure than traditional nuclear medicine tests**

- HeartSafe uses new computer technology to obtain your image with less radioactive isotope

### **More comfortable...Claustrophobic? Back Pain? Shoulder Pain/Arthritis?**

- Our images take about half the time so you will be off the camera faster.

### **Faster Scan...correct image**

- Our special UltraSPECT software means your images will be the same or better with less time on the camera

### **Accurate dose**

- You will receive a more accurate dose with our clinically tested low residual syringes

### **Brand Cardiolite pharmaceutical....not the generic drug**

- Cardiolite has been the premium standard in cardiac imaging for over 17 years
